International Journal of Fatigue
Materials Structures Components

Index to Volume 15 (1993)

No 1 January pp 1–72
No 2 March pp 73–160
No 3 May pp 161–256
No 4 July pp 257–352
No 5 September pp 353–448
No 6 November pp 449–544

Article Index

Number 1 January

A study of the transition from intercrystalline to transcrystalline fatigue crack propagation in different ageing conditions of the alloy Cu–35%Ni–3.5%Cr
G.-X. Wang and K.-H. Schwalbe 3

Fatigue crack propagation in a tensile residual stress field under a two-step programmed test
A. Ohta, A. J. McEvily and N. Suzuki 9

An evaluation of existing methods for the prediction of axial fatigue life from tensile data
J. H. Ong 13

Shape change of surface cracks in round bars under cyclic axial loading
A. Carpinteri 21

The influence of a coal gasifier atmosphere on fatigue crack growth rates in BS 4360 steel
P. J. Cotterill and J. E. King 27

Analysis of weld toe profiles and weld toe cracks
H. L. J. Pang 31

A comparison of failure predictions by dynamic bending and cyclic bending fatigue techniques for Y_2O_3–ZrO_2 ceramics
Wang Jian, Jin Zhihao and Wang Xiaotian 37

Fatigue–environment interactions in a SiC/Ti-15-3 composite
J. Gayda, T. P. Gabb and B. A. Lerch 41

Fatigue load and reliability design of machine-tool components
Jia Yazhou and Jia Zhixin 47

Fracture modes encountered following the application of a major tensile overload cycle
D. Damri and J. F. Knott 53

Number 2 March

Fatigue strength and applications of cast aluminium alloys with different degrees of porosity
C. M. Sonsino and J. Ziese 75

Fatigue strength distributions
V. A. Avakov 84

Improvement of fatigue performance by cold hole expansion. Part 1: Model of fatigue limit improvement
V. Kliman, M. Bílý and J. Prohaćka 93

Improvement of fatigue performance by cold hole expansion. Part 2: Experimental verification of proposed model
V. Kliman, M. Bílý and J. Prohaćka 101

A model for the combined effects of elevated temperature and stress ratio on the LEFM fatigue threshold condition
D. N. Lal 109

The effect of stress amplitude on the cause of fatigue crack initiation in a spring steel
A. Melander and M. Larsson 119

Fatigue strengths of fillet-welded joints containing root discontinuities
C. Miki, K. Tateishi, Heng-da Fan and M. Tanaka 133

Growth behaviour of small fatigue cracks
Zhou Jingen, Zhong Jianyun, Feng Zhongxin and Li Nian 141

Use of a statistical approach to verify the cumulative damage laws in fatigue
F. Z. Choukairi and J. Barrault 145

Number 3 May

Effects of temperature and frequency on fatigue crack growth in 18% Cr ferritic stainless steel
K. Makhlouf and J. W. Jones 163

An analytical master curve for Goodman diagram data
A. Berkovitz and D. Fang 173

On the mechanisms and behaviour of overload retardation in AISI 304 stainless steel
C. S. Shin and S. H. Hsu 181

Possible effects of magnetic fields in fatigue

I. K. Bhat, M. K. Muju and P. K. Mazumdar 193

Influence of loading profile and superimposed flutter load frequency on the fracture behaviour of a submarine hull steel in seawater
M. Z. Shah Khan 199

The formulation of slip bands in aluminium foil subject to variable stress loading and the application of this technique to stress measurement
Y. Nagase, Y. Sawaki and H. Yoshida 205

An improved technique for the prediction of axial fatigue life from tensile data
J. H. Ong 213

Creep-fatigue interaction behaviour of type 308 stainless steel weld metal and type 304 stainless steel base metal
K. Bhanu Sankara Rao, R. Sandhya and S. L. Mannan 221

Cyclic strain resistance and cyclic fracture behaviour of 2124 aluminium alloy
T. S. Srivatsan, D. Lanning Jr and K. K. Soni 231

Stress field intensity approach for predicting fatigue life
Yao Weixing 243

Number 4 July

Fatigue crack growth and closure behaviour of semicircular and semi-elliptical surface flaws
R. G. Chermahini, B. Palmberg and A. F Blom 259

Rainflow analysis: Markov method
M. Frendahl and I. Rychlik 265

The effect of temperature on the behaviour of short fatigue cracks in Waspaloy using an *in situ* SEM fatigue apparatus
R. R. Stephens, L. Grabowski and D. W. Hoeppner 273

Effect of mission cycling on the fatigue performance of SiC-coated carbon–carbon composites
H. Mahfuz, P. S. Das, S. Jeelani, D. M. Baker and S. A. Johnson 283

Multiple-site damage in 2024–T3 alloy sheet
O. Pártl and J. Schijve 293

An automated procedure for determining crack opening from differential displacement signal data
Chung-Youb Kim and Ji-Ho Song 301

In-service loading of AlSi11 aluminium cast alloy in the very high cycle regime
S. E. Stanzl-Tschegg, H. R. Mayer, E. K. Tschegg and A. Beste 311

The development of a flexible, multiple-configuration structural test facility
R. A. Shenoi, P. J. C. L. Read, C. L. Walters and S. C. M. Thelu 317

Aspects of fatigue affecting the design and maintenance of modern military aircraft
S. A. Barter, J. Q. Clayton and G. Clark 325

A multiple crack model for fatigue in welded joints
S. To, S. B. Lambert and D. J. Burns 333

Number 5 September

Cyclic plastic strain response and fracture behaviour of an oxide-dispersion-strengthened copper alloy
T. S. Srivatsan, S. Anand and J. D. Troxell 355

Effect of laser surface treatment on fatigue crack growth resistance in an Fe-Mn-Al austenitic steel
V. K. Saxena, A. Bharti, G. Malakondaiah and V. M. Radhakrishnan 369

Crack initiation and growth during low-cycle fatigue of discontinuously reinforced metal-matrix composites
M. Levin and B. Karlsson 377

Structural reliable life and spectrum difference factor
Chen Zhi-Wei 389

Fatigue life and crack resistance of sheel Al–Li alloy at 293 to 4 K
N. M. Grinberg, V. A. Serdyuk, A. M. Gavrilyako, I. N. Fridlyander, A. M. Drits, T. M. Krymova and I. P. Zhegina 393

Fatigue damage stages in unidirectional glass-fibre–epoxy composites: identification through acoustic emission technique
M. R. Bhat and C. R. L. Murthy 401

A cycle counting method considering load sequence
Zhu Yigang, Zhang Shijie and Yan Minggao 407

A review of thermomechanical fatigue damage mechanisms in two titanium and titanium aluminide matrix composites
T. P. Gabb, J. Gayda, P. A. Bartalotta and M. G. Castelli 413

Cyclic deformation of the alloy Cu–35%Ni–3.5%Cr in the homogenized condition
G.-X. Wang, H. Bomas, R. Böschen and P. Mayr 423

Stress analysis of drillstring threaded connections using the finite element method
A. Tafreshi and W. D. Dover 429

Number 6 November

A new damage parameter for fatigue life predictions under local strain analysis
V. Adrov 451

Effect of load ratio on the deformation behaviour of fatigue crack tips
M. Shimojo, M. Chujo, Y. Higo and S. Nunomura 455

Modelling fatigue crack initiation life
X.-L. Zheng 461

A curvilinear integral method for multiaxial fatigue life computing under non-proportional, arbitrary or random stressing
S. Stephanov 467

Equivalent fatigue load in machine-tool probabilistic reliability. Part I: Theoretical basis
J. Yazhou, W. Yiqiang, S. Guixiang and Z. Zhixin 473

Equivalent fatigue load in machine-tool probabilistic reliability. Part II: Calculation methodology and practical applications
J. Yazhou, S. Guixiang, Z. Zhixin and W. Yiqiang 479

Recovery length in sheathed spiral strands in deep-water platform applications
M. Raoof and I. Kraincanic 485

Fatigue properties of particle-reinforced metal-matrix composites
E. Hochreiter, M. Panzenböck and F. Jeglitsch 493

Fatigue crack initiation in notched specimens of 17Mn4 steel
J. D. Costa and J. M. Ferreira 501

An examination of load shedding during fatigue fracture
R. W. Hertzberg and T. J. Pecorini 509

Studies on thermal fatigue in 3Cr2W8V die steel by positron lifetime and hardness measurements
C. Q. Tang, G. Y. Li, Z. H. Shi, X. Z. Li and B. T. Tao 515

Fatigue strength of welded cover plates on 6261 aluminium alloy I-beams
M. N. James, H. O. Lambrecht and A. E. Paterson 519
